Applicant	Project Title	Project Description
Merri-bek City Council	Electrification of Oak Park Sports and Aquatic Precinct (OPSAP)	<p>Oak Park Sports and Aquatic Precinct consists of the newest of Merri-bek City Council's gas-heated aquatic centres, opened in 2018, as well as a sports pavilion.</p> <p>This project will transition the site to net zero by removing all gas usage. Boilers for heating pool water and showers, as well as kitchen equipment, will be replaced with heat pumps and other electric technology. With electricity backed by certificates from the Crowlands Windfarm, the project will significantly reduce Council's</p>

		<p>carbon emissions. Electrification will reduce energy costs now and in future, as the price of gas continues to increase.</p> <p>By retrofitting an aquatic centre to all-electric and sharing lessons learnt, we will encourage other councils to do the same.</p>
